Subject Index: Volume 31, 1998

Action potentials
thiamine tetrahydrofurfuryl disulfide affecting (Abs), 328
Activation-recovery intervals
spatial pattern of (Abs), 328
and ventricular repolarization properties (Abs), 329
Afterdepolarizations
and veratramine effects on sinoatrial node, 257
Aging
and exercise affecting QTc interval, 111
reproducibility of ECG measurements and coding in, 189
Alcohol
and actions of cocaine and ethylcocaine on sinoatrial preparations, 293
Altitude
and ECG findings in Tibet, 237
Ambulatory ECG
and dual-sector scattering in atrial fibrillation, 227
and modification of intrinsic AV-nodal properties in atrial fibrillation, 281
in silent ischemic heart disease (Abs), 334
Angina pectoris
and T wave inversion in precordial leads, 125
Animal studies
cardioelectric field formation in ventricular depolarization (Abs), 330
effects of calcium channel blockers in transplanted hearts, 51
ethanol affecting actions of cocaine and ethylcocaine on sinoatrial preparations, 293
hypokalemia affecting ECG parameters, 45
magnesium affecting electrical defibrillation in dogs, 137
spatial pattern of epicardial activation-recovery maps (Abs), 328
veratramine effects on sinoatrial node, 257
wavelet analysis of ventricular tachycardia, 245
Anthropometry
and chest electrode positions, 17
Arrhythmias
heterogeneity of risk indicators, 221
Novacode classification of ECG changes in, 157
veratramine-induced, 257
Atrial arrhythmias
atrial escape capture bigeminy, 57, 145
fibrillation
dual-sector scattering in, 227
modification of intrinsic AV-nodal properties in, 281
right atrial electric potential in, 39
induction of either clockwise or counterclockwise flutter, 345
Atrial pacing
sites producing atrial flutter, 345
Atrioventricular block
Mobitz II, supernormal conduction in, 61
Atrioventricular node
dual pathways in atrial fibrillation, 227
modification of intrinsic properties in atrial fibrillation, 281
Autonomic nervous system
in pregnancy, 101

Bigeminy
atrial escape capture, 57, 145
Body surface mapping
error formation in (Abs), 331
lead systems in, 71
repolarization abnormalities in left ventricular hypertrophy (Abs), 331
Bradycardia
and block of accessory pathway in intermittent Wolff-Parkinson-White syndrome, 151
veratramine-induced, 257
Breast tissue
affecting ECG amplitudes, 17
Bundle branch block
left, site of QRS notching in, 269

Calcium channel blockers
assessment in transplanted hearts, 51
Cardiac memory
and post-ventricular tachycardia P wave change, 67
Cardioverter defibrillator, implantable
and low-energy T wave shocks for ventricular fibrillation induction, 31
Chest size
affecting ECG amplitudes, 17
Circadian variability
of QT interval in malignant ventricular arrhythmias (Abs), 333
of vertices, and dual-sector scattering in atrial fibrillation, 227
Cocaine
actions on sinoatrial preparations, ethanol affecting, 293

Coding systems for ECG abnormalities
Mayo system in, compared to Minnesota Code, 303
Minnesota Code in
compared to Mayo system, 303
compared to Novacode system, 170
reproducibility of, 189
Novacode system in, 257
compared to Minnesota Code, 170
definitions for ECG criteria in, 172
Computer analysis
and NHLBI workshop on ECG databases, 83
of variability in ECG measurements, 189
Conduction
sinoatrial
affected by cocaine interactions with alcohol, 293
veratramine affecting, 257
supernormal, in Mobitz II atrioventricular block, 61
Coronary artery disease
and ischemia detection in women, 271
and ST-segment variability during exercise, 197
ventricular tachycardia inducibility in, 278
Coronary sinus pacing
inducing atrial flutter, 345

Databases
NHLBI workshop on, 83
Defibrillation
atrial, right atrial electric potential affecting, 39
outcome affected by ventricular fibrillation voltage, 317
and termination of reentrant activity (Abs), 327
ventricular, magnesium affecting, 137
Depolarization
of sinoatrial node, veratramine affecting, 257
ventricular, cardioelectric field formation in (Abs), 330
Diltiazem
effects in transplanted hearts, 51
Diuretics
and ECG changes from furosemide-induced hypokalemia in rats, 45

Effective refractory period
nicorandil affecting, in long QT syndrome, 117
Electrocardiography practice and science
problems in, 313
Electrodes
lead systems in body surface mapping, 71
standardized placement of chest leads, 17
T wave inversion in precordial leads, 125
Electrophysiologic studies
in atrial fibrillation
dual-sector scattering in, 227
right atrial electric potential in, 39
calcium channel blockers affecting transplanted hearts, 51
supernormal conduction in Mobitz II atrioventricular block, 61
testing with low-energy T wave shocks for ventricular fibrillation induction, 31
Epicardial activation-recovery intervals
spatial pattern of (Abs), 328
Epicardial maps
in ventricular tachycardias, 247
Escape capture bigeminy
atrial, 57, 145
Ethanol
and actions of cocaine and ethylcocaine on sinoatrial preparations, 293
Ethylcocaine
actions on sinoatrial preparations, ethanol affecting, 293
Exercise
and QTc interval in elderly people, 111
Exercise ECG
apex territory perfusion in (Abs), 332
early postinfarction QRS score in (Abs), 334
in postinfarct ischemia detection, 9
QRS duration in ischemia detection in women, 271
ST-segment depression in
false positive, with short PR segment and normal coronary arteries, 203
variability of, 197

Fast pathway characteristics
in chronic atrial fibrillation, 227, 281
Fibrillation
atrial
dual-sector scattering in, 227
modification of intrinsic AV-nodal properties in, 281
right atrial electric potential in, 39
ventricular
absolute voltage values affecting defibrillation outcome, 317
induction with low-energy T wave shocks, 31
Flutter, atrial
clockwise or counterclockwise, direct initiation of, 345
Furosemide
hypocalcemia from, and ECG changes in rats, 45

Heart block
bradycardia-dependent, in intermittent Wolff-Parkinson-White syndrome, 151
left bundle branch, site of QRS notching in, 269
Mobitz II atrioventricular, supernormal conduction in, 61
sinoatrial exit and entrance block in atrial escape capture bigeminy, 57, 145
Heart failure
arrhythmic risk indicators in, 221
Heart rate
resting, after exercise for elderly people, 111
variability of
analysis in heart failure, 221
and dual-sector scattering in atrial fibrillation, 227
in pregnancy, 101
Heart transplantation
effects of calcium channel blockers in, 51

Hilbert transforms
in analysis of ECG voltage related to defibrillation outcome, 317
Histograms
in atrial fibrillation, 227, 281
Hypertrophy
left ventricular
and prognosis after infarction, 91
repolarization potentials in (Abs), 331
reproducibility of ECG measurements of, 189
right ventricular, at high altitude in Tibet, 237
Hypokalemia
and ECG changes in rats, 45

Infarction. *See* Myocardial infarction
Inverse electrocardiology
thoracic model priorities for (Abs), 333
Ischemia, myocardial
acute, reversible QRS changes in, 209
beat-to-beat QRS variability in, 336
daily ECG monitoring in silent disease (Abs), 334
detection in women, 271
postinfarction detection of, 9
territorial aspects at exercise (Abs), 332
Isoproterenol
and QRS morphology during ventricular pacing, 133

Late potentials
in sustained ventricular tachycardia, 362
Left ventricle
hypertrophy
and prognosis after infarction, 91
repolarization potentials in (Abs), 331
reproducibility of ECG measurements of, 189
prediction of recovery after infarction, 1
thickness of walls affecting site of QRS notching in left bundle branch block, 269
Letter to the Editor
site of QRS notching in left bundle branch block, 269
Lorenz plots
dual-sector scattering in atrial fibrillation, 227
Luo-Rudy cell model
of myocardial excitation (Abs), 326

Magnesium sulfate
affecting electrical defibrillation in dogs, 137
with glucose, insulin, and potassium, affecting AV-nodal properties in atrial fibrillation, 281
Mayo ECG coding
compared to Minnesota system, 303
Memory, cardiac
and post-ventricular tachycardia P wave change, 67
Minnesota Code classification of ECG changes
compared to Mayo system, 303
compared to Novacode system, 170
reproducibility of, 189
Mobitz II atrioventricular block
supernormal conduction in, 61
Model studies
activation-recovery interval in ventricular repolarization (Abs), 329
cardioelectric field formation in ventricular depolarization (Abs), 330
coupled torso and myocardium simulator using Luo-Rudy cell model (Abs), 326
spatial covariance of pericardial potentials (Abs), 326
termination of reentrant activity with defibrillation (Abs), 327
thoracic model priorities for inverse electrocardiology (Abs), 333
Myocardial infarction
beat-to-beat QRS variability in, 336
diagnosis with statistical analysis of digital ECG data (Abs), 329
early postinfarction exercise QRS score in (Abs), 334
ischemia detection after, 9
location of infarct affecting ventricular tachycardia inducibility, 278
Novacode classification of ECG changes in, 157
prognosis from preinfarction ECG, 91
QRS vectorcardiographic loop areas in first acute infarction (Abs), 332
QT dispersion in, 1
reliability of Minnesota and Mayo ECG coding systems in, 303

Nicorandil
in long QT syndrome, 117
Nifedipine
effects in transplanted hearts, 51
Novacode ECG classification system, 157
compared to Minnesota Code, 170
definitions for ECG criteria in, 172

Overdrive
and veratramine effects on sinoatrial node, 257

P waves
changes after ventricular tachycardia, 67
ectopic, in atrial bigeminy, 57, 145
Pace mapping
isoproterenol affecting QRS morphology in, 133
Pacing, atrial
sites producing atrial flutter, 345
Pericardial potentials
spatial covariance of (Abs), 326
Periodic rhythm
veratramine-induced, 257
Potassium
channel opener in long QT syndrome, 117
furosemide-induced hypokalemia causing ECG changes in rats, 45
PR segment
short, with false positive ST depression, 203
Precordial ECG mapping
T wave inversion in, 125
Pregnancy
anatomic changes in, 101

Problems in electrocardiography
in practice and in science, 313
Programmed ventricular stimulation
and tachycardia inducibility in coronary artery disease, 278

QRS complex
beat-to-beat variability in ischemia and infarction, 336
duration of
and ischemia detection in women, 271
and postinfarct ischemia detection, 9
exercise score early after infarction (Abs), 334
isoproterenol affecting, during pace mapping, 133
reversible changes in acute ischemia, 209
site of notching in left bundle branch block, 269
vectorcardiographic loop areas in first acute infarction (Abs), 332

QT interval
after exercise for elderly people, 111
circadian variability in malignant ventricular arrhythmias (Abs), 333
dispersion of
in myocardial infarction, 1
reproducibility of measurements, 189
nicorandil in long QT syndrome, 117

R wave
amplitude changes during exercise, 197
Reentrant activity
termination with defibrillation shocks (Abs), 327
Refractory period
effective, nicorandil affecting, in long QT syndrome, 117
functional, in atrial fibrillation, 227
Repolarization, ventricular
analysis of potentials in left ventricular hypertrophy (Abs), 331
assessment with activation-recovery intervals (Abs), 329
dispersion as marker of arrhythmic risk, 221
Resting ECG
beat-to-beat QRS variability in ischemia and infarction, 336
Right atrium
electric potential during atrial fibrillation, 39
Right ventricle
hypertrophy at high altitude in Tibet, 237
stimulation site affecting ventricular tachycardia inducibility, 278
R-R interval
histograms in atrial fibrillation, 227, 281

Schmitt, Otto H.
In Memoriam, 155
Signal-averaged ECG
abnormal root mean square voltages in ventricular tachycardia, 362
Simulations
torso and Luo-Rudy cell models in (Abs), 326
Sinoatrial exit and entrance block
in atrial escape capture bigeminy, 57, 145
Sinoatrial node
conduction affected by cocaine interactions with alcohol, 293
veratramine affecting, 257
Slow pathway characteristics
in chronic atrial fibrillation, 227, 281
Sokolow-Lyon criteria
in left ventricular hypertrophy diagnosis, 91
Spectral analysis
heart rate variability in pregnancy, 101
wavelet transform analysis of ventricular tachycardias, 246
ST-segment
false positive depression in exercise, with short PR segment and normal coronary arteries, 203
shift during acute myocardial ischemia, QRS changes with, 209
variability during exercise, 197
Sympathovagal balance
in pregnancy, 101

T wave
inversion
in myocardial infarction, 1
in precordial ECG mapping, 125
low-energy shocks for ventricular fibrillation induction, 31
Tachycardia, ventricular
and abnormal root mean square voltages in signal-averaged ECG, 362
inducibility in coronary artery disease, 278
isoproterenol-induced, and QRS morphology during pace mapping, 133
P wave change after, 67
wavelet analysis of, 245
Thiamine tetrahydrofurfuryl disulfide
affecting action potentials (Abs), 328
Tibet
ECG findings at altitude in, 237
Transplanted hearts
calcium channel blockers affecting, 51

Variability of ECG measurements
beat-to-beat QRS variability in ischemia, 336
circadian
of QT interval in malignant ventricular arrhythmias (Abs), 333
of vertices, and dual-sector scattering in atrial fibrillation, 227
reproducibility of data in, 189
in ST-segment during exercise, 197
Vectorcardiography symposium
abstracts from, 326
Ventricles. *See* Left ventricle; Right ventricle

Ventricular arrhythmias
fibrillation
absolute voltage values affecting defibrillation outcome, 317
induction with low-energy T wave shocks, 31
malignant, circadian variability of QT interval in (Abs), 333
and risk for sudden death in heart failure, 221
tachycardia
and abnormal root mean square voltages in signal-averaged ECG, 362
inducibility in coronary artery disease, 278
isoproterenol-induced, and QRS morphology during pace mapping, 133
P wave change after, 67
wavelet analysis of, 245
Ventricular repolarization
analysis of potentials in left ventricular hypertrophy (Abs), 331
assessment with activation-recovery intervals (Abs), 329
dispersion as marker of arrhythmic risk, 221
Verapamil
effects in transplanted hearts, 51
Veratramine
effects on sinoatrial node, 257
Voltage of ECG
abnormal root mean square voltages in ventricular tachycardia, 362
during ventricular fibrillation, affecting defibrillation outcome, 317

Wavelet transform analysis
in ventricular tachycardias, 245
Wolff-Parkinson-White syndrome
intermittent, bradycardia-dependent block in, 151
